**5.11 TACTICAL® EXTENDS POPULAR RECON™ LINE WITH
NEW FOOTWEAR FOR WOMEN**

New Women's 5.11 RECON Trainer for Multi-function and Performance

SHOT Show® (Booth #13162), LAS VEGAS (Jan. 14, 2014)—5.11 Tactical®, the global innovator of tactical gear, today introduced the Women's 5.11 RECON™ Trainer at the 2014 NSSF SHOT Show. Following the success of the 5.11 RECON Trainer for men, the company is extending its RECON line with select products for women designed to help maximize females' functionality and performance across a range of missions—from fitness and outdoor training to duty-driven responsibilities and more.

“The popularity of the RECON Trainer created customer demand for a women's version, which is why we've expanded the shoe to this new market,” said Guy Burgstahler, chief marketing officer at 5.11 Tactical. “The RECON shoe offers all the superior quality and features of the original men's line, providing unbeatable ventilation, flexibility and strength for those who train with a higher purpose”.

The Women's RECON Trainer is engineered to be a lightweight cross training shoe. Available in three colors, Caribbean Sea, Storm and Scope Orange, the footwear combines a minimalist design with long lasting performance. Its HELCOR® panels provide strength and flexibility, while the full-length CMEVA midsole adds structure and support. The RECON Trainer also features a broadened forefoot to promote toe splaying—maximizing engagement and improving balance. The footwear's integrated Rope Ready™ Zone provides assistance when climbing. In addition, an 8 mm forward angle drop from heel to toe creates a lower profile that increases acceleration and control while remaining lightweight. Authentic OrthoLite® insoles are used for added comfort and are removable for a customized fit.

The Women's RECON Trainer retails for \$99.99.
